

THE CITY OF OAKLAND PARK

FERAL FRIENDS PROGRAM

The City of Oakland Park is embarking on a pilot program to address concerns about feral cats using the “TNR” approach. TNR (trap, neuter, return) has proven to be the only effective method for stabilizing and reducing the number of cats in feral cat colonies over time, in some situations all the way down to zero. TNR is also the only humane method to accomplish this. As a progressive and tolerant City, we are proud to partner with Animal Aid of Oakland Park and respect all life by embracing this approach.

Are you a cat lover? Do you care about animals and want to ensure their health and safety? Volunteers are needed to perform the basic tasks in support of this program. Duties will include safe trapping, transportation to a local treatment center and the return of animals to the original colony. Training provided.
