

LAKESIDE SAND PINE PRESERVE CLEAN UP

This beautiful park boasts over five acres of native sand pine scrub and plants, walkway, elevated decking and educational shelter. It is also home to many Florida native species including the gopher tortoise. Each year, volunteers mount an effort to eliminate invasive species of plant life while maintaining trails and walkways.

Participants should wear

long sleeve shirts and pants

and work shoes that you don't mind getting dirty. No open toe shoes. Please bring gloves, hat and sunscreen. Water, tools and light snack will be provided.

Lakeside Sand Pine Preserve

2820 NW 27th Avenue

Oakland Park

Saturday, January 26, 2019

Orientation followed by clean up:

8:30 a.m. – Noon
