## Getting Started with a NOOK eReader

You can borrow and transfer eBooks to your NOOK eReader using the free Adobe Digital Editions (ADE) application on your computer.

### **Step 1:**

Install ADE on your computer. You will also need to authorize ADE with an Adobe ID or OverDrive account before you can download library eBooks.

### **Step 2:**

Open your library's OverDrive website on your computer.

### **Step 3:**

Sign into your library's OverDrive website, borrow an eBook, and download the EPUB or PDF version of that book. Once downloaded, it should open automatically in ADE.

### **Step 4:**

Plug your NOOK into your computer, then use ADE to transfer the eBook you borrowed to your NOOK.

### **Step 5:**

Once you've transferred a library eBook to your NOOK, you can open and read it like you would any other eBook.
